Subject: Bowing down to Microsoft?? Why!

Dear DOJ representative.

It is clear that inflicting Microsoft operating systems on unsuspecting poor school kids will not make the monopolistic practices of Microsoft any weaker. If you really want to weaken or punish them and to cut down on their future abuses of power, either split the company or make them give away millions of dollars of hardware preloaded with Linux and the fantastic Star Office, NOT with yet more force fed preloaded Microsoft products which just tie in their monopoly further.

Let me know what you think of my proposal.

Thanks
Murray Zipp
